Figure 1. The number of cases of COVID-19 in the Republic of Armenia, by region, sex, and age group, as of March 2020. The figure is a bar chart showing the number of cases (Y-axis, 0 to 1000) across different regions (X-axis: Yerevan, Gyumri, Vanadzor, Tbilisi, Baku, Yerevan, Gyumri, Vanadzor, Tbilisi, Baku). The bars are color-coded by sex (Male: Blue, Female: Red) and age group (0-14: Light Blue, 15-64: Medium Blue, 65+: Dark Blue). The data shows a significant increase in cases in Yerevan and Gyumri, with a peak in the 15-64 age group.
